

Yixuan Wang

Ph.D. Student, Mechanical & Aerospace Engineering · University of Florida · Expected May 2027

Gainesville, FL · wang.yixuan@ufl.edu · (352) 888-9238 · nomushroomw.github.io · Google Scholar · GitHub

RESEARCH INTERESTS

Nonlinear control, learning dynamical systems, optimization, generative modeling, reinforcement learning, machine learning theory.

EDUCATION

University of Florida — Ph.D., Mechanical & Aerospace Engineering 2024 – Present

Nonlinear Controls and Robotics (NCR) Lab · Advisor: Prof. Warren E. Dixon · Coadvisor: Dr. Dan P. Guralnik

Johns Hopkins University — M.S., Computer Science 2023 – 2024

University of Florida — M.S., Mechanical Engineering 2020 – 2022

Tongji University — B.S., Mechanical Design, Manufacture and Automation 2015 – 2020

PEER-REVIEWED PUBLICATIONS

- Effective Model Pruning: Measuring the Redundancy of Model Components**
Yixuan Wang, Dan Guralnik, Saiedeh Akbari, Warren E. Dixon
ICML 2026 · **Spotlight** · arXiv:2509.25606
- Quantifying Trade-Offs Between Stability and Goal-Obfuscation**
Yixuan Wang, Dan Guralnik, Warren E. Dixon
IEEE Conference on Decision and Control (CDC) 2026 · arXiv:2605.06630
- Goal Inference with Rao-Blackwellized Particle Filters**
Yixuan Wang, Dan P. Guralnik, Warren E. Dixon
IFAC World Congress 2026 · arXiv:2512.09269
- Off-Dynamics Reinforcement Learning via Domain Adaptation and Reward Augmented Imitation**
Yihong Guo, **Yixuan Wang**, Yuanyuan Shi, Pan Xu, Anqi Liu
NeurIPS 2024 · arXiv:2411.09891

PREPRINTS & MANUSCRIPTS

1. **Riemannian Lyapunov Optimizer: A Unified Framework for Optimization**
Yixuan Wang, Omkar Sudhir Patil, Warren E. Dixon
arXiv preprint, 2026 · arXiv:2601.22284
2. **Energy Generative Modeling: A Lyapunov-based Energy Matching Perspective**
Yixuan Wang, Wenqian Xue, Warren E. Dixon
arXiv preprint, 2026 · arXiv:2605.05530
3. **Lyapunov-Based Kolmogorov-Arnold Network (KAN) Adaptive Control**
Xuehui Shen, Wenqian Xue, **Yixuan Wang**, Warren E. Dixon
arXiv preprint, 2025 · arXiv:2512.21437

RESEARCH EXPERIENCE

- University of Florida** — Graduate Research Assistant, NCR Lab

2024 – Present
- Advisor: Prof. Warren E. Dixon · Coadvisor: Dr. Dan P. Guralnik
- **Learning dynamical systems and optimization.** Develop Lyapunov and dynamical-systems formulations of learning algorithms, with applications to optimizer design, reinforcement learning, and stability analysis.
 - **Generative modeling and control.** Study generative models as dynamical systems from a control-theoretic perspective, including distributional transport, stability, and constrained generation.
 - **Model efficiency.** Study principled measures of redundancy in neural network components and their use in pruning and compression.
 - **Inference and autonomous systems.** Develop Bayesian intent inference and control policies that jointly regulate physical motion and an observer's belief, with formal bounds on goal information disclosure.
- Johns Hopkins University** — Graduate Researcher

2023 – 2024
- **Off-dynamics reinforcement learning.** Policy transfer under dynamics shift via domain-adaptation reward modification and imitation learning (NeurIPS 2024).

HONORS & AWARDS

- ICML Spotlight — *Effective Model Pruning*2026
- Herbert Wertheim College of Engineering Achievement Award Scholarship, University of Florida2020

TECHNICAL SKILLS

Machine Learning

PyTorch; generative models (energy-based, diffusion, flow matching); reinforcement learning; model compression

ML Systems	Multi-GPU distributed training (DDP), Slurm-based HPC workflows
Theory	Nonlinear & adaptive control, Lyapunov analysis, dynamical systems, optimization on manifolds, Bayesian estimation & particle filtering
Programming	Python, C/C++, MATLAB / Simulink, Git, LaTeX
Languages	English (proficient), Mandarin (native), German (B2)
